Professional Summary

Front-End Developer, Data Analysis, and Programming Instructor with 2+ years of experience creating responsive, accessible web platforms and delivering tech education to 250+ students. Proven leadership as Academic Head at Minders, skilled in React.js, Java, and object-oriented design. Strong communicator with a passion for mentoring, problem-solving.

EDUCATION

Cairo University, Cairo, Egypt.

Bachelor of Computer Science & Artificial Intelligence.

Graduated: Sep 2025

WORK EXPERIENCE

Branch Manager | Go Academy | Jan 2025 – Present

- Supervise and support teaching staff, ensuring high-quality lesson delivery and consistent academic standards.
- Monitor and evaluate classroom performance, providing feedback to improve teaching effectiveness.
- Ensure a high-quality learning experience for students by maintaining structured processes.

Data Analyst | Atlas Plast | Nov 2025 – Mar 2026

- Analyzed procurement and sales data across 15+ manufacturing partners to forecast demand and optimize purchasing decisions, reducing overstock and improving inventory efficiency.
- Collaborated with suppliers to manage purchasing plans and ensure timely availability of materials based on data-driven demand predictions for upcoming months.
- Identified slow-moving and stagnant inventory items through data analysis, supporting strategic decisions to improve stock turnover and maximize sales opportunities.

Academic Head | Minders | Oct 2024 – Oct 2025

- Supervised 20 instructors across 9 technical tracks, maintaining academic quality and engagement.
- Designed and executed a strategic plan emphasizing programming, public speaking, and team collaboration.
- Mentored new instructors, improving their communication, teaching, and leadership skills.
- Recognized as **Best Head** of the season.

Front-End Developer Intern | KeraLink | Aug 2024 – Oct 2024

- Developed and maintained KeraLink.net, a digital eye care platform, ensuring responsiveness.
- Developed and deployed reusable front-end components and implemented dynamic routing for [go-academy.net](#), using HTML, CSS, and JavaScript, improving page load time and scalability.
- Ensured fast load times by applying performance optimization techniques, including lazy loading and component memorization.

Programming Instructor | Go Academy, iSchool | Feb 2024 – Feb 2025

- Delivered Scratch, Python, and Flowchart-based lessons to 250+ students (ages 8–17)
- Planned and delivered interactive lessons, simplifying complex concepts and making them accessible for young learners.
- Designed engaging projects using [code.org](#) and visual coding tools to support diverse learning styles.
- Collaborated with other instructors to create engaging activities and monitor student progress.

Academic Member | Minders | Jan 2024 – Sep 2024

- Delivered engaging Python sessions to students through practical projects and teamwork-based learning.
- Provided personalized guidance and feedback to students, improving their understanding and confidence in coding.
- Guided 10+ students through debugging and project-based exercises, enhancing their confidence in programming.
- Recognized as **Best Member** in the Minders Academic Committee for outstanding performance and contribution.

ICPC Mentor | Faculty of Computers and Artificial Intelligence, Cairo University | Sep 2023 – Jan 2024

- Mentored students in preparation for the International Collegiate Programming Contest (ICPC), focusing on algorithmic problem-solving and competitive programming techniques.

PROJECTS

Keralink.net

- Built a production-ready React.js platform with modular components and responsive UI.
- Applied lazy loading and code splitting for performance optimization.
- Ensured cross-browser compatibility and smooth navigation across devices.

Go-Academy.net

- Improved an e-learning platform (**HTML**, **CSS**, **JS**) for students aged 8–17.
- Designed an instructor dashboard for slot scheduling, tracking, and feedback review.
- Collaborated with educators to align features with teaching goals.

InstaPay System

- Simulated an online payment system in **Java** with secure transfers and bill payments.
- Established mock APIs for real-time transactions and tested them using Postman.
- Used strategy pattern to improve modularity and maintainability.

Othello Game

- Built a complete Othello game in **Python** with **AI** using **Minimax + Alpha-Beta** pruning.
- Developed a **PyGame** interface with multiple difficulty levels.

Photoshop Applications

- Built a **C++** image editor with 24+ filters, supporting grayscale and RGB modes.
- Enabled real-time preview for all filters, including edge detection and color inversion.

Racing Game

- Enhanced a 3D adventure game in **Unity** and **C#** with interactive environments.
- Implemented a dynamic inventory system and quest-based progression.

TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, JavaScript, React.js.
- **Languages:** Python, Java, C++, C#.
- **Concepts:** Object Oriented Design, Design Patterns.
- **Game Development:** Unity Engine.

CERTIFICATIONS

- Object-Oriented Programming Design – Coursera (February 2024)
- Design Patterns – Coursera (March 2024)
- IELTS (B2 Level) – British Council (May 2022)

ADDITIONAL INFORMATION

- Ranked **1st in Iraq** for solving **500+ algorithm problems**; achieved **Pupil** on **Codeforces**
- **Volunteer Experience:** Organized community events supporting education and youth technology programs.
- **Languages:** Arabic (Native), English (Fluent), French (Conversational)
- **Awards:** **Best Member** and **Best Head** – Minders Academic Committee
